## ASOPRS 2021 SPRING SCIENTIFIC SYMPOSIUM

June 25-27, 2021 Virtual Meeting

# WELCOME

Dear Friends and Colleagues,

Welcome to the 2021 ASOPRS Virtual Spring Scientific Symposium! Despite the availability of vaccinations, the continued impact of the pandemic on work and travel restrictions for many of our members required us, with the Executive Committee, to make the difficult decision to cancel the highly anticipated meeting in Kauai. Spending time with each other has always been a priceless part of the spring meetings, whether we are learning or having lots of fun. We'll do our best virtually again this year.

We are immensely grateful to **Amanda Macrina and Tisha Kehn** for their countless hours in bringing the spring program to fruition, especially in pivoting from an in-person meeting to virtual. We also thank **our colleagues** who submitted a tremendous number of excellent abstracts, the **Program Committee**, and the **CME Subcommittee** who meticulously reviewed all the submissions so that we could put together a quality program for our members.

In addition, we send a huge welcome to members of **reciprocal OPRS societies** worldwide for joining us at this year's virtual spring meeting. Our hearts, minds and thoughts are with every one of you, as we all continue to prioritize what is most important in our lives and work for the health of our communities. Lessons that we have learned during this difficult year will help us rise above the next challenges, be resilient, and forge innovations as we progress forward together.

The live virtual spring meeting will again be spread over three days to allow for less interference with work and personal time. The live session on Friday evening will feature high quality presentations on orbital trauma, pediatric, and corneal neurotization updates. The general sessions on Saturday and Sunday will include all the favorites of YASOPRS Eye Openers, eyelid, orbit, oncology, aesthetic surgery, lacrimal, tough cases, and practice management sessions. Highlights include a Thyroid Eye Disease update, minimally invasive facial contouring session, and a lower eyelid "Face Off" addressing the common challenges of the tear trough, lower eyelid cicatrix, and orbital septum. This session includes our guest speaker, Dr. Naresh Joshi, a preeminent consultant Oculoplastic surgeon in London, who will try to convince us to close the septum or "ignore it at your peril." Sunday will also introduce two panels: Complex Congenital Deformities of the Eyelid, and an Oculofacial Tumor Board, both of which will present quick cases for discussion.

Questions from the audience are always welcome and can be submitted through Slido on the live-stream page or the chat room for real-time interaction with each other. By popular demand, there will be two Zoom breakout rooms immediately after the meeting on Sunday: "Ask the Coders", and "Mastering Social Media for Your Practice". Bring your questions and ask away!

Given the limited time in the live virtual conference, you will find superb research that will be available to view **On Demand**, before and after the meeting, in the form of narrated presentations, posters, and surgical videos. The live-streamed meeting will also be recorded and available to registrants throughout the summer.

As before, please take the opportunity to visit our sponsors and exhibitors in the **virtual Exhibit Hall** to learn about the latest commercial products and services that may help improve your practice. You can also interact with exhibitor representatives for 30 minutes before the program each day via Zoom links within the virtual booths.

While we are not together in person, don't miss the "Wish we were in Hawaii" video, featuring our members, family, and friends "virtually celebrating" our spring reunion, which will be played just before the start of the daily meeting!

It is a privilege and honor to serve as your president and program chair for the 2021 ASOPRS Spring meeting. We look forward to hearing your great talks and discussion, and we hope to see everyone soon!

Cat N. Burkat, MD, FACS  
ASOPRS Spring Meeting Program Chair

# GENERAL INFORMATION

## Symposium Objectives

- To provide a forum for presentation of new concepts, ideas, techniques, and research in functional and aesthetic reconstructive oculofacial plastic surgery
- To discuss current practice management techniques and coding methods, access to care, safety, and professionalism in oculoplastic surgery
- To illustrate new advancements in medical and surgical management of orbital and eyelid tumors and inflammations
- To provide an update on the advancing field of oculoplastic surgery
- To allow ample time for discussion with experts of oculofacial and reconstructive surgery in a collegial atmosphere

## ATTENDEE POLICY

As a registered attendee of the live-virtual meeting and/or a viewer of the recorded meeting, you agree to the following and acknowledge if you disregard this policy you may be barred from attending future meetings:

### As an attendee of the live-virtual Spring Scientific Symposium, I agree:

- To not share my login credentials to the virtual meeting site with others.
- To not take photos or screen shots or make audio or video recordings of any portion of the meeting.
- The moderator may announce my name and read my question (if selected).
- To allow my participation in the Breakouts (voice and/or camera) to be recorded and shared with registrants post-meeting.

## Continuing Medical Education

Continuing Medical Education information and Financial Disclosures can be found in the 2021 Virtual Spring Scientific Symposium Syllabus.

## Meeting Evaluation/CME Certificate

A link to an evaluation will be provided to attendees via email. You will have an opportunity to save a CME certificate once you have completed the evaluation. Your feedback is carefully considered when planning future meetings. Thank you in advance for helping ASOPRS improve our Scientific Symposium.

# GENERAL INFORMATION

## Education Disclaimer

Registrants for this symposium understand that medical and scientific knowledge is constantly evolving and that the views and techniques of the instructors are their own and may reflect innovations and opinions not universally shared. The views and techniques of the instructors are not necessarily those of ASOPRS but are presented in this forum to advance scientific and medical education. ASOPRS disclaims any and all liability arising out the information presented in this meeting. Registrants also understand that operating rooms and health care facilities present inherent dangers and as such they shall confirm to all proper medical practices and procedures for the treatment of patients for whom no medical history is available.

## Industry Disclaimer

Industry promotional opportunities, including but not limited to tradeshow and product theaters, are provided for informational purposes. ASOPRS does not undertake to verify the claims of, or assess the products or services offered by, any company presenting during ASOPRS' meetings, nor does ASOPRS' receipt of a fee from, and provision of space to, such companies constitute an endorsement or recommendation by ASOPRS. Attendees must make their own independent judgments as to the advisability of entering into a business transaction.

## Code of Conduct: Anti-Harrassment Policy

## Conflict of Interest Policy and Procedure

## Cancellations

ASOPRS issued refunds, less a \$50 administrative fee, upon receipt of written notice on or before May 25, 2021. No refunds will be made after this date. Refunds will not be made for no-shows.

## Allergan Aesthetics

an AbbVie company

At Allergan Aesthetics, an AbbVie company, we develop, manufacture, and market a portfolio of leading aesthetics brands and products. Our aesthetics portfolio includes facial injectables, body contouring, plastics, skin care, and more.

## BioTissue

AmnioGuard® is the super-thick cryopreserved umbilical cord tissue graft that suppresses inflammation, promotes ocular surface healing, and provides more durable tensile strength to avoid ocular-surface surgical challenges related to oculoplastic reconstructions, conjunctival tumor excisions, glaucoma shunt tube exposure prevention, and many other ocular surface indications.

## Castle Biosciences

Castle Biosciences is a cancer diagnostics company focused on providing physicians and patients with personalized, clinically actionable genomic information enabling more accurate treatment plan decisions. From its formation in 2008, Castle Biosciences has applied emerging artificial intelligence techniques in molecular diagnostics to improve patient care and outcomes. Our DecisionDx family of molecular diagnostic tests have the ability to meaningfully impact how cancers are diagnosed and managed (<https://castletestinfo.com>).

Castle Biosciences is a leading provider of molecular testing services for patients with uveal melanoma including prognosis (DecisionDx®-UM) as well as optional sequencing and PRAME testing. DecisionDx-UM accurately predicts whether a tumor is at high risk of metastasis, and is standard of care in a majority of ocular oncology practices. The DecisionDx-UM test is run from a single biopsy of a patient's primary tumor and measures expression levels of 15 genes in the tumor to determine whether a patient is at low risk (Class 1A), intermediate risk (Class 1B) or high-risk (Class 2) for metastasis within 5 years.

Castle Biosciences also offers tests in cutaneous melanoma and cutaneous squamous cell carcinoma, and has active research and development programs for tests in other diseases with high clinical need. The company is based in Friendswood, Texas with laboratory operations in Phoenix, Arizona ([www.CastleBiosciences.com](http://www.CastleBiosciences.com)).

## FCI Ophthalmics

FCI stands with ASOPRS, ready for the future of oculoplastic surgery. Even in uncertain times, FCI remains inspired, prepared, and committed to the development of effective devices that make a difference in your hands.

FCI's specialized expertise and 35 years of strategic design, development, and manufacturing, manifests itself in a broad and growing portfolio of treatment solutions available worldwide. The global oculoplastic community relies on FCI products because they perform as expected and help optimize outcomes.

This year again, we are thrilled to present you with two new advancements in oculoplastic surgery: LacriJet® and Ritleng®+.

## Genentech

For more than 40 years, we've been following the science, seeking solutions to unmet medical needs. As a proud member of the Roche Group, we make medicines to treat patients with serious medical conditions.

## Horizon Therapeutics

Horizon is focused on researching, developing and commercializing medicines that address critical needs for people impacted by rare and rheumatic diseases. Our pipeline is purposeful: we apply scientific expertise and courage to bring clinically meaningful therapies to patients. We believe science and compassion must work together to transform lives.

## Integrated Orbital Implants (IOI)

Since 1985, Bio-Eye Orbital Implants have become the gold standard by which other implants are measured. No other implant is made from a natural source and has the same structure and composition as human bone.

Bio-eye Orbital Implants become a "living" part of the patient's body. The Bio-eye Orbital Implant has the longest track record of all modern implant materials. There are implants made in Europe of artificial hydroxyapatite that are not the same in structure, composition or quality.

## OMIC

OMIC is the largest insurer of ophthalmologists in America and the only carrier dedicated specifically to the specialty. Owned and operated by ophthalmologists, OMIC's record of defending ophthalmic claims is unparalleled.

# AWARDS

## Orkan G. Stasior Leadership Award

This award is given to an individual who has demonstrated distinguished service in the field of ophthalmic plastic and reconstructive surgery through education, research, humanitarian activities and/or service to the Society. This award is presented in recognition of the leadership of ASOPRS charter member, Orkan G. Stasior.

**The recipient of this year's Orkan G. Stasior Leadership Award is: Elizabeth A. Bradley.**

**Elizabeth A.  
Bradley**

Elizabeth Bradley, MD, MHS is Associate Professor of Ophthalmology in the Mayo Clinic Department of Ophthalmology. She is program director for the ASOPRS-sponsored fellowship at Mayo Clinic. Dr. Bradley's research interests include health-related quality of life, patient satisfaction, and patient safety in oculoplastic surgery. In addition to her current role as Executive Secretary, Dr. Bradley has had the opportunity to serve ASOPRS by advising on quality metrics for government payors, working as methodologist on the AAO's Ophthalmic Technology Assessment Committee, and participating in multi-center research studies.

Dr. Bradley has had outstanding mentorship at every stage of her training. She is especially grateful for the mentorship, support, and friendship of Drs. George Bartley and Jim Garrity throughout her career at Mayo Clinic.

## James A. Katowitz Pediatric Award

This award is given to an individual for longstanding contributions in pediatric oculofacial plastic surgery.

**The recipient of this year's James A. Katowitz Pediatric Award is: Antonio Augusto Velasco Cruz.**

**Antonio Augusto  
Velasco Cruz**

Antonio Augusto V. Cruz, graduated from the Fluminense School of Medicine in 1976. He obtained a PhD degree in 1985 from the University of São Paulo. In 1989 he was the recipient of a grant for post-doctoral training in the Department of Brain and Cognitive Sciences in the Massachusetts Institute of Technology, Cambridge, USA. During 2.5 years in the Boston area he observed the oculoplastic service at Massachusetts Eye and Ear Infirmary led by John Shore. Since 1992 when he returned to Brazil, he has been entirely devoted to eyelid and orbital clinical and research. In 1995 he became full Professor of Ophthalmology at the University of São Paulo. In 2012 he was hired for two years as Adjunct Professor at Johns Hopkins and Chief of Oculoplastics at the King Khaled Eye Specialist Hospital in Riyadh, Saudi Arabia. Back in Brazil he returned to the University of São Paulo. He has published 186 peer review articles and 33 book chapters.

# AWARDS

## Richard K. Dortzbach Teaching Award

This award is given to an individual with significant contribution to the field of oculoplastics through outstanding teaching, academic, scientific, and scholarly achievement and for dedication throughout his or her profession.

**The recipient of this year's Richard K. Dortzbach Teaching Award is: Robert C. Kersten.**

**Robert C. Kersten**

Robert C. Kersten is chief of ophthalmic plastic and reconstructive surgery for UCSF ophthalmology. Dr. Kersten earned his medical degree at the University of Iowa Carver College of Medicine, where he also completed a residency in ophthalmology and a fellowship in ophthalmic plastic, orbital and reconstructive surgery. He was a professor of ophthalmology at the University of Cincinnati before joining UCSF in 2009.

Kersten is widely considered one of the preeminent international authorities on ophthalmic plastic and reconstructive surgery. He has authored more than 200 published pieces on the diagnosis and treatment of disorders and cosmetic problems in the eye area. He also served for several years as editor of the American Academy of Ophthalmology's textbook on surgery for the eyelids, orbits and tear-duct system.

Kersten has lectured internationally in more than 30 countries and speaks frequently in North America. He has been recognized by his peers as one of America's Best Doctors for more than 20 years, and he recently received the American Academy of Ophthalmology's prestigious lifetime achievement award.

Kersten takes an annual leave of absence from UCSF in order to perform surgeries and teach ophthalmologists in the developing world. He also enjoys skiing and cycling in his free time.

## The David M. Reifler YASOPRS Rising Star Award Presented on behalf of the ASOPRS Foundation

Named in honor of a generous donor to the ASOPRS Foundation, the Foundation will award the 2021 David M. Reifler YASOPRS Rising Star Award to an oral, poster or video presenter. The recipient of the award will be announced during the live-virtual Spring Scientific Symposium.

**A Young ASOPRS (YASOPRS) is an official ASOPRS member who has 8 years or less experience after graduation from an ASOPRS accredited fellowship, or alternatively, satisfies the Category II membership requirements and has 8 years or less experience after fellowship graduation. Fellows-in-Training in an ASOPRS-accredited fellowship are also considered for the award.**
