

# 2022 HYBRID SPRING SCIENTIFIC SYMPOSIUM

May 12-15, 2022, Greenbrier, White Sulphur Springs, West Virginia

# PROGRAM

# WELCOME TO 'ALMOST HEAVEN'

It is a delight to bring us together in this special part of the country. Members of ASOPRS gathered here 45 years ago when George Buerger, a charter member, hosted 30 people at the 1977 Spring Meeting. How we have grown! Whether you are returning or this is your first visit, I hope you enjoy the unassuming, down to earth magical quality that exists here.

Steven Couch together with Amanda Macrina and Tisha Kehn have put together a marvelous program. This meeting will showcase the unique expertise of some of our most experienced members. The Senior ASOPRS group will present a symposium including how to take a creative idea to invention and market. Reflecting on the unsettled nature of our world, Robb Mazzoli has organized a special Stop the Bleed® program on Friday afternoon. As always, we are grateful for the industry support from our sponsors and exhibitors.

In addition to the scientific program, the meeting will also update members on the governmental affairs and business aspects of our society. Stuart Seiff will present to YASOPRS regarding political advocacy, a critical component to our subspecialty. There will be a preview of new branding strategies, the product of extensive work lead by Rob Fante, chair of the Marketing and Branding Committee.

The Spring Meeting has long been a time to enjoy one another's company. The Greenbrier provides many opportunities, most listed under the activities portion of its website at [www.greenbrier.com](http://www.greenbrier.com). Don't miss the bunker tour. This is a piece of fascinating history that was kept secret for decades, in plain sight. The Greenbrier also has world class golf and tennis. Our Spring Meeting Golf Tournament will be Saturday afternoon at the beautiful Meadows Golf Course. From falconry to glassblowing to the spa, I hope you find time to enjoy these activities.

We will welcome our newest members at the top of Kate's Mountain during our Saturday evening Annual Banquet. The venue is outdoors so casual attire and comfortable footwear are a must. If the weather cooperates, it should be a spectacular sunset over the mountains to celebrate.

With Best Wishes,

Jennifer A. Sivak-Callcott, MD  
ASOPRS President

Steven M. Couch, MD  
ASOPRS Spring Meeting  
Program Chair

# FEATURED SPEAKER

## Aaron P. Mitchell, MD, MPH

Saturday, May 14, 11:18 am - noon EDT

### ASOPRS FOUNDATION RALPH E. WESLEY LECTURE

*Conflict of Interest in Medical Practice: What Do We Know?*

Aaron Mitchell, MD, MPH, is an Assistant Attending at Memorial Sloan Kettering Cancer Center, where he practices as a medical oncologist and health services researcher. After graduating from NYU School of Medicine, he completed his internal medicine training at Duke University Hospital and medical oncology fellowship at University of North Carolina at Chapel Hill. He received an MPH in Epidemiology from UNC's Gillings School of Global Public Health, and completed a postdoctoral research fellowship at UNC's Cecil G. Sheps Center for Health Services research. He joined Memorial Sloan Kettering in 2018.

His research interests are in drug pricing, drug regulatory policy, and the determinants of oncology practice patterns, with a particular focus on financial determinants such as reimbursement policy and physician-industry conflict of interest. He seeks to understand how changes to current drug pricing models and reimbursement models for oncology services may be used to achieve better patient outcomes and reduce low-value care. He previously led a study funded by ASCO's Conquer Cancer Foundation to assess oncologists' responsiveness to reimbursement incentives to use high-cost, low-efficacy drugs, and he continues to study physician-level factors associated with use of low-value prostate cancer treatments with support from the National Cancer Institute. Additionally, he has led a series of studies analyzing the influence of financial relationships with the drug industry on physician practice patterns, published in JAMA Internal Medicine, JAMA Oncology, and Annals of Internal Medicine.

His clinical interests are in genitourinary malignancies; in addition to his primary appointment in Memorial Sloan Kettering's Department of Epidemiology and Biostatistics, he holds a co-appointment in the Genitourinary Oncology Service, treating patients with prostate and bladder cancer.

# GENERAL INFORMATION

## Symposium Objectives

- To provide a forum for presentation of new concepts, ideas, techniques, and research in functional and aesthetic reconstructive oculofacial plastic surgery
- To discuss current practice management techniques and coding methods, access to care, safety, and professionalism in oculoplastic surgery
- To illustrate new advancements in medical and surgical management of orbital and eyelid tumors and inflammations
- To provide an update on the advancing field of oculoplastic surgery
- To allow ample time for discussion with experts of oculofacial and reconstructive surgery in a collegial atmosphere

## ATTENDEE POLICY

As a registered attendee of the hybrid meeting, you agree to the following and acknowledge if you disregard this policy you may be barred from attending future meetings:

### As an attendee of the hybrid Spring Scientific Symposium, I agree:

- To not share my login credentials to the meeting site with others.
- To not take photos or screen shots or make audio or video recordings of any portion of the meeting.
- Moderators may announce my name and read my question (if selected).

## Continuing Medical Education

Continuing Medical Education information and Financial Disclosures can be found in the 2022 Spring Scientific Symposium Syllabus.

## Meeting Evaluation/CME Certificate

A link to an evaluation will be provided to attendees after the meeting via email. You will have an opportunity to download a CME certificate once you have completed the evaluation. Your feedback is carefully considered when planning future meetings. Thank you in advance for helping ASOPRS improve our Spring Scientific Symposium.

## [Code of Conduct: Anti-Harrassment Policy](#)

## [Conflict of Interest Policy and Procedure](#)

## Cancellations

ASOPRS issued refunds, less a \$100 administrative fee, upon receipt of written notice on or before April 11, 2022. No refunds will be made after this date. Refunds will not be made for no-shows.

# GENERAL INFORMATION

## Education Disclaimer

Registrants for this symposium understand that medical and scientific knowledge is constantly evolving and that the views and techniques of the instructors are their own and may reflect innovations and opinions not universally shared. The views and techniques of the instructors are not necessarily those of ASOPRS but are presented in this forum to advance scientific and medical education. ASOPRS disclaims any and all liability arising out the information presented in this meeting. Registrants also understand that operating rooms and health care facilities present inherent dangers and as such they shall confirm to all proper medical practices and procedures for the treatment of patients for whom no medical history is available.

## Industry Disclaimer

Industry promotional opportunities, including but not limited to tradeshow and product theaters, are provided for informational purposes. ASOPRS does not undertake to verify the claims of, or assess the products or services offered by, any company presenting during ASOPRS' meetings, nor does ASOPRS' receipt of a fee from, and provision of space to, such companies constitute an endorsement or recommendation by ASOPRS. Attendees must make their own independent judgments as to the advisability of entering into a business transaction.

## Photography and Social Media Policy

ASOPRS' policy for the use of photography and social media at the Scientific Symposium is intended to strike a balance between the needs of scientists, physicians and other health care professionals, patients, and advocates for the latest oculofacial plastics information and the needs of presenters to protect their proprietary content from unauthorized use.

- Non-flash photography is allowed for personal, social or noncommercial use.
- Respect presenters who state they do not want their slides and/or content shared on social media.
- Attendees taking photos must do so in a non-disruptive manner so as not to disturb the presenter and other attendees.
- Slides with patient faces or other identifiable information cannot be shared on social media due to HIPAA regulations.

Video recording, live audio and/or video streaming is strictly prohibited. Failure to comply with this policy may result in being removed from the session and/or meeting.

## Notice of Photography

By attending the ASOPRS 2022 Spring Scientific Symposium, you are entering an area where photographs will be taken and by entering the area, you consent to publication, exhibition, or reproduction of your image for promotional purposes, advertising, inclusion on websites, social media, or any other purpose by ASOPRS and its representatives. You release ASOPRS, its employees, and each and all persons involved from any liability connected with the taking of photographs and you waive all rights to any claims for payment or royalties in connection with any use of the photographs. You also waive any right to inspect or approve any photograph taken by ASOPRS or the person or entity designated to do so by ASOPRS. If you do not want your image used as stated above, please email us at [info@asoprs.org](mailto:info@asoprs.org).

## STOP THE BLEED® COURSE (NON-CME) – *Hayes Room*

*See registration for availability.*

Bleeding is the #1 cause of preventable death after injury. A person can bleed to death within minutes, and when minutes matter, waiting for EMS to arrive is not an option; bystanders must be the first first-responders. The [STOP THE BLEED® \(STB\)](#) program is designed to teach everyday people these life-saving skills.

In conjunction with the [American College of Surgeons Committee on Trauma](#) and STB, ASOPRS is proud to offer STB certification training at the Spring Meeting. The full course consists of a short (~20-30 min) self-paced [online didactic instruction module](#) that must be completed beforehand and a hands-on skills station that will be offered at the Greenbrier (approximately 30 min). After completing the online didactic module, please send us a copy of the certificate for proper ACS STB documentation. Each participant must have their own certificate of completion.

The course is free and open to all – Members, family, guests, medical, and non-medical alike.

## AFTERNOON ACTIVITY

Please note: This activity may be full. Please check with Registration for further information.

12:30 pm

### ASOPRS Golf Tournament — *The Meadows Golf Course*

*(Supported in part by Gunther Weiss Scientific Glassblowing & Integrated Orbital Implants, Inc.)*

The ASOPRS Annual Golf Tournament will be at The Meadows Golf Course at The Greenbrier. Lakeside/Meadows was originally opened in 1911, was redesigned by Seth Raynor in 1923, expanded to 18 holes by Dick Wilson in 1962 and then redesigned by Bob Cupp (and renamed) in 1999. A dramatically upgraded and improved Meadows Course held its official grand opening on September 6, 2017. Featuring an updated routing plan, newly reconstructed greens and stacked sod bunkers, the course has taken its place among the other championship designs at The Greenbrier. **Golf Tournament Package: \$270**, includes greens fees, golf cart, taxes and Historic Preservation Fee.

# AWARDS

## ASOPRS Outstanding Contribution Award

This award is given to an individual or individuals who make a legendary single, or longstanding multiple contributions to ASOPRS.

The recipients of this year's ASOPRS Outstanding Contribution Award are **Thomas E. Johnson, Cat N. Burkat, Catherine J. Hwang, and Steven M. Couch** for their work on the virtual/hybrid meetings during the pandemic.

**Thomas E.  
Johnson**

Thomas E. Johnson is a Professor of Clinical Ophthalmology at the Bascom Palmer Eye Institute, University of Miami Miller School of Medicine, serves as Service Chief for the Division of Oculoplastic and Reconstructive Surgery, and directs an ASOPRS fellowship. He performed fellowships in Ophthalmic Pathology with Dr. William Spencer at the California Pacific Medical Center in San Francisco, Oculoplastic Surgery with Drs. Robert Weatherhead and Amin Nasr at the King Khaled Eye Specialist Hospital in Riyadh, Saudi Arabia, and Oculoplastic and Reconstructive Surgery with Dr. David Tse at the Bascom Palmer Eye Institute. Dr. Johnson has a passion for international ophthalmology, having worked in Riyadh, Saudi Arabia for six years at the King Khaled Eye Specialist Hospital. Additionally, he has volunteered on ORBIS International, the “Flying Eye Hospital” 15 times, performing both on and off-the-plane programs, with a special emphasis on Africa. He has also volunteered in Haiti, notably helping to establish a field hospital in Port-au-Prince after the 2011 earthquake.

Thomas has given national and international presentations, published multiple peer-reviewed articles, and edited two books on Oculoplastic Surgery topics. He is an avid teacher, spending his Fridays staffing the ophthalmology residents in their oculoplastic clinics and surgeries. He credits his enjoyment of oculoplastic surgery and his successes to his outstanding colleagues at the Bascom Palmer Eye Institute, the excellent staff at ORBIS International, his mentors Drs. Spencer, Weatherhead, Nasr, and Tse, and his loving family including his wonderful daughter Olivia.

**Cat N. Burkat**

Cat Burkat, MD, FACS is a Professor in Ophthalmology and Co-Director of the University of Wisconsin-Madison International Ophthalmology Initiatives where she is passionate about global work. She graduated from Harvard University followed by a dual-fellowship at the University of Wisconsin-Madison. She serves as the ASOPRS Scientific Symposium Program Chair, World Ophthalmology Congress ASOPRS Liaison, and ASOPRS fellowship faculty. Dr. Burkat is the current Editor-In-Chief, and prior Lead Section Editor, of the AAO EyeWiki online education site, has directed over 70 skills courses at the AAO scientific meetings, writes for the BCSC Committee, and has received the AAO Senior Achievement and Secretariat Awards. She serves as Writing Committee Chair and Senior Mentor for the American Board of Ophthalmology, and holds leadership roles in Women Professors of Ophthalmology, and the AAO Minority Ophthalmology Mentoring program. Cat thanks her wonderful family, Jason and Hisa, for all their support.

## ASOPRS Outstanding Contribution Award

**Catherine J.  
Hwang**

Catherine Hwang is a Staff surgeon at the Cole Eye Institute Cleveland Clinic. Dr. Hwang serves as faculty for an ASOPRS-approved fellowship, trains residents, and has written over 50 peer reviewed papers, 20 book chapters, and a textbook. Dr. Hwang lectures internationally on various topics including filler related blindness. Dr. Hwang also serves her community as an elected Council Member of Pepper Pike, Ohio. She would not be where she is today without her mentors Drs. Norman Shorr, Robert Goldberg, Jonathan Hoenig, Roberta Gausas, and James Katowitz and of course Julian D. Perry (literally, for dragging her to Cleveland!).

**Steven M. Couch**

Steven M. Couch, MD, FACS is an Associate Professor at the John Hardesty, MD Department of Ophthalmology and Visual Sciences at Washington University in St. Louis. Dr. Couch graduated from the University of Missouri-Kansas City School of Medicine then trained in ophthalmology at Mayo Clinic in Rochester, Minnesota. Following residency, he completed fellowship at the St. Louis Combined Oculofacial Plastic Surgery fellowship at Washington University in St. Louis and Ophthalmic Plastic and Cosmetic, Inc. Dr. Couch is an associate member of the Society of Heed Fellows, member of the Eye Study Club and a long-standing board examiner for the ABO. Dr. Couch is faculty for the St. Louis combined ASOPRS-approved fellowship and the Patient Safety/Quality Director in the Washington University Department of Ophthalmology. He credits his success to his family and Drs. Phil Custer, John Holds, Jim Garrity, Bill White.

# AWARDS

## Orkan G. Stasior Leadership Award

This award is given to an individual who has demonstrated distinguished service in the field of ophthalmic plastic and reconstructive surgery through education, research, humanitarian activities and/or service to the Society. This award is presented in recognition of the leadership of ASOPRS charter member, Orkan G. Stasior, MD.

**The recipient of this year's Orkan G. Stasior Leadership Award is Cat N. Burkat.**

**Cat N. Burkat**

Cat Burkat, MD, FACS is a Professor in Ophthalmology and Co-Director of the University of Wisconsin-Madison International Ophthalmology Initiatives where she is passionate about global work and mentoring underrepresented students, and has established two nonprofit foundations. She graduated from Harvard University followed by a dual-fellowship at the University of Wisconsin-Madison. She serves as the ASOPRS Scientific Symposium Program Chair, World Ophthalmology Congress ASOPRS Liaison, and ASOPRS-approved fellowship faculty. Dr. Burkat is the current Editor-In-Chief, and prior Lead Section Editor, of the AAO EyeWiki online education site, has directed over 70 skills courses at the AAO scientific meetings, writes for the BCSC Committee, and has received the AAO Senior Achievement and Secretariat Awards. She serves as Writing Committee Chair and Senior Mentor for the American Board of Ophthalmology, and holds leadership roles in Women Professors of Ophthalmology, and the AAO Minority Ophthalmology Mentoring program. Cat thanks her wonderful family, Jason and Hisa, for all their support.

## Richard K. Dortzbach Teaching Award

The Dortzbach Teaching Award is given to an individual with significant contribution to the field of oculoplastics through outstanding teaching, academic, scientific, and scholarly achievement and for dedication throughout his or her profession.

**The recipient of this year's Richard K. Dortzbach Teaching Award is Louise A. Mawn.**

**Louise A. Mawn**

Louise Mawn is a Professor of Ophthalmology and Neurological Surgery at Vanderbilt University Medical Center. She is the Division Chief of the Ophthalmic Plastic and Reconstructive Surgery Service of the Vanderbilt Eye Institute and holds the Jean Ewing Love and James Randle Love Directorship in Ophthalmology. Dr. Mawn directs an ASOPRS-approved fellowship. She serves on the board of the International Thyroid Eye Disease Society. She has given presentations and written articles and chapters on a wide range of oculoplastic topics. She attributes her success and enjoyment of oculoplastic surgery to her mentors, including Drs. David Jordan, Steve Gilberg, Jeff Nerad, and Keith Carter as well as her cherished ASOPRS friends who have taught her so much and are so generous with their time and insights.

# AWARDS

## James A. Katowitz Pediatric Award

This award shall be given to an individual for longstanding contributions in pediatric oculofacial plastic surgery.

**The recipient of this year's James A. Katowitz Pediatric Award is David T. Tse.**

David T. Tse

David T. Tse, MD, is a Professor of Ophthalmology at the Bascom Palmer Eye Institute of the University of Miami Miller School of Medicine. He is the inaugural holder of the Nasser Al-Rashid Distinguished Chair in Ophthalmic Plastic, Orbital Surgery, and Oncology and founded the Rashid Orbital Vision Research Center. The Center, which Tse directs, is the first cure-based orbital research laboratory focused on finding novel therapies for orbital malignancies, traumatic optic nerve injury, and biomedical studies. Dr. Tse is on the Editorial Board of the American Journal of Ophthalmology and served as a Director of the American Board of Ophthalmology from 2001 to 2009. Dr. Tse is the Program Director for an ASOPRS-approved fellowship and has trained 32 fellows.

### || Allergan Aesthetics, an AbbVie company

**Great people, great products, greater opportunity.**

At Allergan Aesthetics, an AbbVie company, we develop, manufacture, and market a portfolio of leading aesthetics brands and products. Our aesthetics portfolio includes facial injectables, body contouring, plastics, skin care, and more.

With our own research and development function focused on driving innovation in aesthetics, we're committed to providing the most comprehensive science-based product offering available.

**We are driven to help consumers make informed decisions about their aesthetic needs.**

It's our job to stand out. The aesthetics market is changing fast. We know change never stops, and we're constantly seeking to better understand the mindsets and motivations of the consumers we serve in order to focus on meeting unmet needs as we innovate.

Our goal is to consistently provide our customers with innovation, education, exceptional service, and a commitment to excellence, all with a personal touch.

For more information, visit [www.AllerganAesthetics.com](http://www.AllerganAesthetics.com).

### || BD (Becton Dickinson)

BD is one of the largest global medical technology companies in the world, rooted in our purpose of advancing the world of health. Our dedicated ASC team and a comprehensive portfolio of products and services, including V. Mueller surgical instruments, can help the 'new build' or the established ASC.

### || Candela

For over 50 years, Candela has been leading the global energy-based medical aesthetic device industry with a comprehensive product portfolio based on Science, Results, and Trust. With a global distribution footprint in over 100 countries and hundreds of patents issued around the world, Candela strives to deliver the highest levels of efficacy, safety and reliability to our customers. We are dedicated to the development of innovative products that allow providers to offer a broad range of treatment solutions, including laser hair removal, body shaping, tattoo removal, scar and striae treatments and the reduction of vascular and skin pigmentation.

### || **FCI Ophthalmics**

FCI S.A.S. is a world leader in the development of a wide range of ophthalmic devices. Since the company's inception in 1984, FCI has been dedicated to provide physicians with innovative, high-performance and mostly exclusive products covering the fields of expertise of Oculoplasty, Dry Eye, Retina and Cataract.

### || **Gunther Weiss Scientific Glassblowing Co. Inc.**

Conjunctivodacryocystorhinostomy (CDCR) surgery provides relief to thousands of people every year who suffer from tear duct problems ranging from collapsed tear ducts and excessive tearing caused by accident, injury, birth defects, or environmental strain. Left untreated, patients may experience swelling, infections, increased swelling, tearing “wet eye” and severe pain. In 1963, Dr. Lester T. Jones and Gunther Weiss collaborated in developing a solution for tear duct problems. They developed highly specialized glass tubes called “Lester T. Jones Tear Duct Tubes”, designed for insertion into the nasolacrimal duct. The body develops scar tissue around the tube, which holds it in place, forming a new tear duct. Gunther Weiss Scientific Glass Blowing Company offers Lester T. Jones Tear Duct Tubes in a variety of lengths and diameters to address most patient needs.

### || **Horizon Therapeutics**

#### || **Horizon Therapeutics – Medical Affairs**

Horizon is focused on researching, developing and commercializing medicines that address critical needs for people impacted by rare and rheumatic diseases. Our pipeline is purposeful: we apply scientific expertise and courage to bring clinically meaningful therapies to patients. We believe science and compassion must work together to transform lives.

### || **Integrated Orbital Implants, Inc.**

The only fully integrated natural orbital implant and peg system. 37 years of successful use.

### || OMIC

Malpractice insurance for ophthalmologists.

### || Poriferous LLC

Su-Por Surgical Implants are long-term, implantable medical devices for the augmentation and restoration of the craniomaxillofacial area. Made from pure porous high-density polyethylene, the devices are available in sheets, blocks, spheres, and anatomical shapes. The unique nature of the device allows for the patient's own tissue to integrate, eliminating migration, reducing infection, and improving clinical performance.
