Northwestern Medicine is offering a free virtual CME program to help you stay connected and meet your CME requirements during this unprecedented time. Join Northwestern faculty as they address the latest advances in the field in respect to treatment and management of thyroid eye disease, vision and life-threatening diagnoses in oculoplastics and address important concerns regarding cosmetic procedures of the periocular region.

Program Objectives

After attending this educational activity, participants should be able to:

1. Identify patients with thyroid eye disease who may benefit from treatment.
2. Review updates in management options for thyroid eye disease, including targeted immunomodulatory therapy.
3. Recognize vision and life-threatening orbital and periocular conditions.
4. Institute appropriate diagnostic testing and management for critical oculoplastic conditions.
5. Identify complications of cosmetic periocular procedures and how to avoid and manage them.
6. Recognize when to consult an oculoplastic surgeon for patients with orbital and periocular conditions.
